

Clearstory Allowances: Real-Time Control For Real Costs

Still guessing where your allowance dollars went?

You're not alone. Most GCs rely on spreadsheets or exports from their financial software, which means surprises show up when it's too late. Clearstory Allowances gives you real-time visibility into what's spent, what's pending, and what's left, so you can manage budget issues proactively and speed up closeouts by eliminating last-minute fire drills.

- ✓ **Real-time allowance tracking across all trades**
- ✓ **Owner-facing and contractor-facing allowances**
- ✓ **Clean, export-ready reporting without the admin**
- ✓ **Visibility into pending, used, and remaining dollars**
- ✓ **Built directly into your existing COR workflows**

Create Allowances

Set up Allowance, Contingency, or Hold buckets for anything—design changes, overtime, jobsite conditions, you name it.

Tag CORs

Assign received CORs from trades to the relevant bucket. Clearstory auto-deducts the value in real time—no math, no manual entry.

Track Usage Live

See what's spent, what's pending, and what's left to use—by project, trade, or allowance type.

Package & Share

Generate clean logs and reports with documentation for execs or owners in a few clicks. Stay in sync without email chains or PDF markups.

"This mirrors our internal process really well. We can actually track what's in review, approved, and pending billing."

Claire Bremehr
Project Engineer, Turner Construction

Stop managing allowances with exports and spreadsheets.
