

# Clearstory Allowances: Real-Time Control For Real Costs

## Track Allowance Usage As It Happens

Tired of getting visibility too late in the game? Allowance buckets are often set early, then managed via spreadsheets and financial software exports. Clearstory Allowances give you real-time visibility into how contingency, design changes, and owner-directed allowances are being used, all backed by documentation you can trust.

- ✓ **Live visibility into allowance usage**
- ✓ **Accurate forecasting with fewer surprises**
- ✓ **Real-time alignment between GCs and trade partners**
- ✓ **Visibility into pending, used, and remaining dollars**
- ✓ **Clean, audit-ready reporting**

### Live Tracking

Your GC can assign CORs directly to allowance buckets as they're submitted, so usage is tracked live, not reconstructed later.

### Smooth Closeouts

Make smarter mid-project decisions and wrap up closeouts fast with clear, shared visibility into every allowance dollar—no surprises, no rework.

### Real-Time Visibility

See real-time draws and balances across every bucket, backed by trustworthy, up-to-date data.

### Audit-Ready Reporting

Every dollar is tied to scope, cost, and backup. No more scrambling for clarity at the end.

***"We're going to use this in our monthly report to our project owners. It's already way better than the spreadsheet version."***
